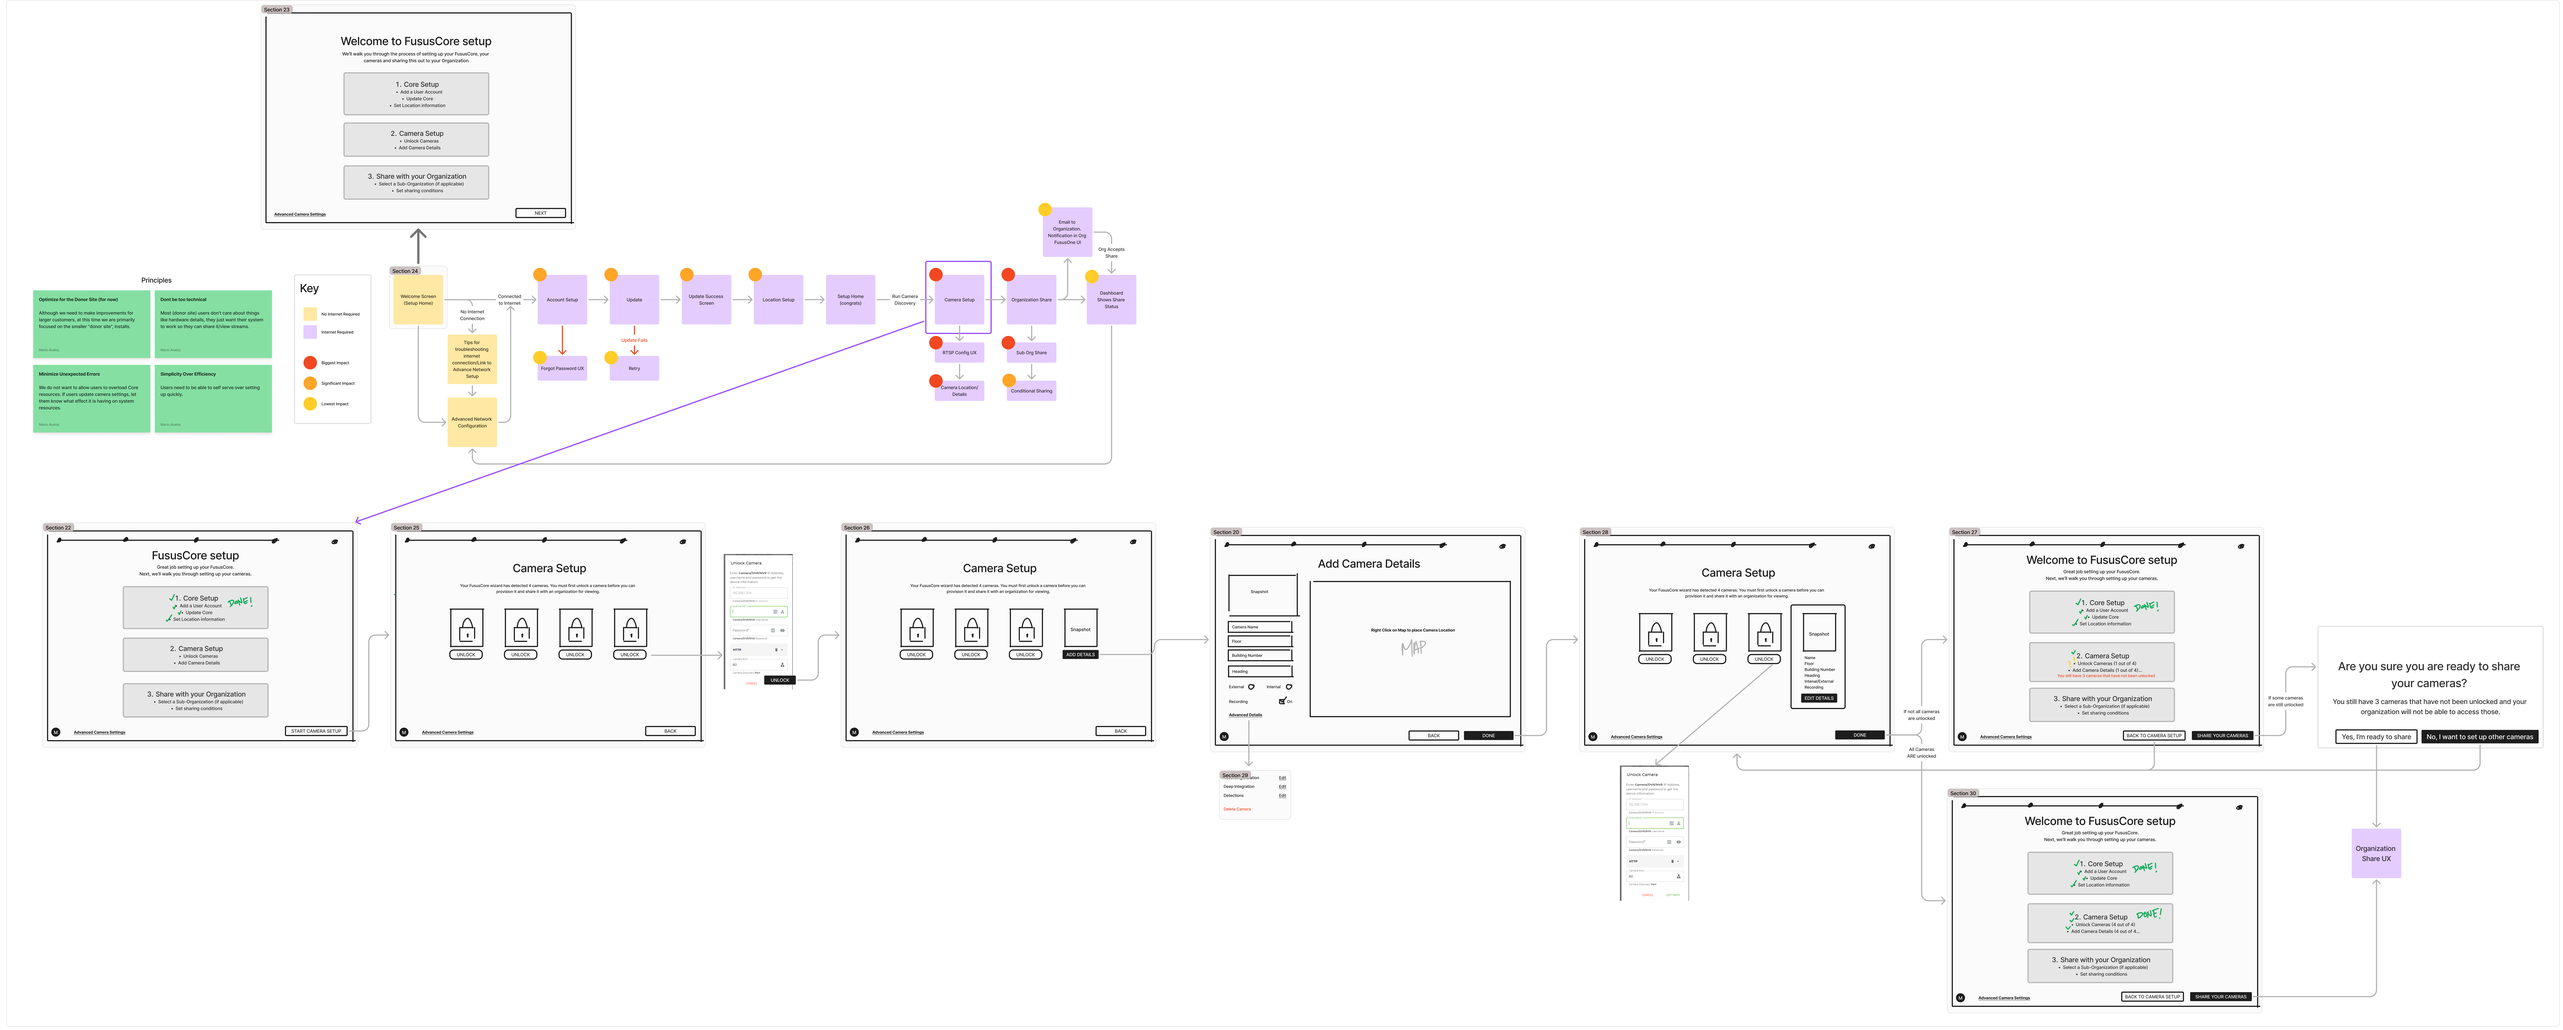
Review



Section 23
Welcome to FususCore setup
We'll walk you through the process of setting up your FususCore, your cameras and sharing this out to your Organization
1. Core Setup
• Add a User Account
• Update Core
• Set Location information
2. Camera Setup
• Unlock Cameras
• Add Camera Details
3. Share with your Organization
• Select a Sub-Organization (if applicable)
• Set sharing conditions
Advanced Camera Settings

Principles
Optimize for the Donor Site (for now)
Although we need to make improvements for larger customers, at this time we are primarily focused on the smaller "donor site", installs.
Mario Avalos
Dont be too technical
Most (donor site) users don't care about things like hardware details, they just want their system to work so they can share it/view streams.
Mario Avalos
Minimize Unexpected Errors
We do not want to allow users to overload Core resources, if users update camera settings, let them know what effect it is having on system resources.
Mario Avalos
Simplicity Over Efficiency
Users need to be able to self serve over setting up quickly.

• Update Core
• Set Location information
DONE!
2. Camera Setup
• Unlock Cameras (1 out of 4)
• Add Camera Details (1 out of 4)...
You still have 3 cameras that have not been unlocked
3. Share with your Organization
• Select a Sub-Organization (if applicable)
• Set sharing conditions
Advanced Camera Settings
BACK TO CAMERA SETUP
SHARE YOUR CAMERAS
If some cameras are still unlocked
Are you sure you are ready to share your cameras?
You still have 3 cameras that have not been unlocked and your organization will not be able to access those.
Yes, I'm ready to share
No, I want to set up other cameras
